Discover a new world of possibilities with Electric Home Design

Deciding to build or renovate your home and make it truly your own is an exciting step and we're here to help you discover the incredible possibilities for unlocking your home's potential.

In this magazine, we'll help you to plan and budget, provide guidance on the best electrical solutions for each room, and offer ideas and inspiration to help make your home a place that you'll never want to leave. From the kitchen to the home office, bedrooms to bathrooms, and every space in between; whether you love décor and style inspiration, or you want your home to be smart and respond intuitively to your lifestyle.

It's really useful to make notes as you discover products and solutions that you like, so you can have them ready when you sit down with your electrician to create your electrical plan.

Clipsal has proudly been in Aussie homes, delivering world-leading electrical innovations, for over 100 years. We know that choosing the right electrical solutions for your lifestyle has a huge impact on how you live in and enjoy your home. Clever decisions made now can help you create a flexible home and save you time and additional costs down the track.

Imagine living in a home that's seamlessly connected and truly reflects you. A home that doesn't just fit into your busy life, but enhances it. A home where every detail is considered and shows off your style, your personality, your taste. A haven that's intuitive, smart and adaptable, with abundant power points and lighting and temperature control that can be customised to suit the time of day. A space for impressive entertaining and a memory-making place that connects the people in it today and grows with you well into tomorrow. This is Electric Home Design from Clipsal.

Planning and budgeting for good electric home design

Whether you are building a new house or renovating a family home, the electrical elements play a very important part in how we experience our homes. When planned right, electric home design works seamlessly to make your home life smarter, safer, more stylish and sustainable.

It is essential to engage your builder and electrician early in the process. They'll be able to help you plan and visualise how you will use the space, provide information and guidance on what good electric home design looks like, and help set you and your family up for life.

1 | Finding inspiration

One of the most exciting parts of building or renovating is looking for ideas and inspiration.

Explore what others have done: check out websites such as ArchiPro, Houzz and Pinterest. Many professionals show off their best and most inspirational projects there. Make a note of the brands you like best; sign up to their newsletters and follow them on social media. Buy interior design magazines, explore blogs, attend expos, and watch home inspiration and renovation TV shows to learn about the latest trends and innovations. It'll also give you an idea of the process involved.

Dream big! You can always narrow it down to suit your budget later.

2 | Planning it right

Electric home design is far more than just wiring and layout. It's about the overall look, feel, and functionality of your home.

Ask yourself: What's most important to you?
A cosy and comfortable space for your family?
An aesthetically pleasing home with curated artwork and furnishings that reflect your style and taste?
How about a home that's at the forefront of innovation to make daily life as seamless and sustainable as possible?

The next step is to think about how you will use each area. Will your kitchen be a multifunctional space, where your family eats breakfast in the morning and then sets up for homework in the afternoon?

What about your dining room? Will it be your work-from-home space by day and an elegant entertainment space by night? Think about the possibilities and review the room-by-room inspiration and advice in this magazine to help you plan and visualise your dream home.

On page 32 you'll find a comprehensive wish list you can use as you explore this magazine. Don't forget to take notes of the products you'd like to discuss with your electrician and design consultant once you're ready.

3 | Setting the budget

Factoring in an electrical plan at the outset of a project is important; much of the groundwork is difficult to do retrospectively – it will also be more expensive.

Electrician Andy Hart from Hart Electrical says that it's important to trust your electrician. "A lot goes into your final invoice and not all of it is visible. When you see a power point on the wall it might not look like it was a hard job to get that there, but it could have been - especially in a renovation."

"Everyone who will do quality work is going to give around the same sort of invoice at the end." – ELECTRICIAN ANDY HART

As a general rule, allocate 10–15% of your budget for electric home design, and you'll be on your way to setting yourself up for success. This figure can vary depending on the age and size of your home.

"The age of the property and its wiring will determine if the wiring is safe. If it has deteriorated, then you'd have to look at replacing it and perhaps updating your switchboard too. This can add another \$1,500–\$3,000 to the bill," says Tom Matic from Matic Electrical. If you're renovating, Tom recommends starting with an assessment of your home's wiring and switchboard as that can significantly impact your overall budget.

4 | Engaging with professionals

Now that you know what you want and how you want it, it's time to ask for professional help.

Book an appointment at a Clipsal showroom near you to experience and explore all our electrical, smart home, safety, and energy efficiency solutions for yourself, and if you would like help planning, Clipsal also offers a professional design service. On completion of an in-person or virtual consultation, you'll leave feeling inspired and armed with a detailed electrical plan for you, your builder and electrician, along with an itemised list of products. Book these services at clipsal.com/design

Finding the right tradespeople to help you with your project can also be challenging as it goes far beyond finding the lowest quote. Look for people who'll be with you every step of the way, who are as committed as you are to building a beautiful home that adds value to your life. Visit clipsal.com/locate to explore our network of trusted partners.

A smart and intuitive home

To live in a smart home is to enjoy a life that is easier, more comfortable and more energy efficient.

A smart home can let you know when the kids get home from school; it can turn the iron off if you forget; and it can even help you get ready for movie nights or to make sure everything is off when rushing out the door.

It's no wonder that more people are including smart home elements in their electric home design.

Today's smart home technology is affordable, easy to use and can be installed in new or existing homes without the need for rewiring. It's scalable too, so you can start small and add extra elements as your family grows or your needs change. A smart home can let you see and control almost everything that is happening electrically in your home from wherever you are.

What is a smart home and how does it work?

A 'smart home' is a property in which electrical appliances and devices can be controlled via Bluetooth®, or remotely over the internet (usually through a single smartphone app) and are often linked for added customisation.

This could be as simple as connecting your heated towel rail to a smart switch to schedule when it turns on and off, or as advanced as linking multiple home technologies for easy control from your smart device.

Smart home systems like Clipsal Wiser are simple to install with no extra wiring required and provide the ability to easily add more products over time. You can see and control each element from your smartphone with the Wiser Home app.

For larger new build properties with complex technical needs, a specialist wiring system like SpaceLogic C-Bus offers advanced whole home automation.

Your electrician or design consultant will be able to advise you on the best system for what you want to achieve in your home.

Why have a smart home?

Put simply, a smart home gets your house working for you and adds many benefits to daily life.

Energy efficiency – Nothing runs unnecessarily in a smart home, cutting down on power costs and environmental impacts.

Our solutions provide insights and visibility of energy usage, energy costs and helps to optimise energy usage and solar self-consumption. Sensors and timers can ensure lights or appliances aren't left on

Look out for these icons to see how you can use Wiser Moments to enhance your home.

Imagine having blinds that open as the sun rises, an all-off moment you can activate as you leave home, or garden lighting that illuminates at dusk and turns off automatically after you've gone to bed. A Clipsal Wiser Smart Home adapts to how you want to live.

unintentionally and you can even minimise heating and cooling requirements with electronic blinds that automatically close at a certain temperature or light level.

Convenience – Forget multiple remote controls or phone apps. Run your home from a single app on your smartphone or tablet, from wherever you are. Forgot to turn the lights off before you left for work? Do it from the app at the office. You can even combine actions – a 'Homecoming Moment' could open the garage door, and turn the outside and inside lights on as you arrive home from work.

Peace of mind – Check that you remembered to shut the garage door. Be notified if doors or windows open when you're away, and even get an alert if a leak or smoke is detected. Blinds and lights can be scheduled to open and shut and turn on and off when you're away too.

Comfort – Blinds and ceiling fans can be automatically operated to help keep a room comfortable. Protect against mould and damp too, with humidity sensors that trigger exhaust fans in the laundry or bathroom. Move around safely in the middle of the night with sensors to automatically turn lights on at a low level around the house.

Added value – Investing in smart home technology can add value to your home. With a multitude of lifestyle benefits, smart homes are attractive to future buyers.

How do you create a smart home?

Our flexible smart home solutions can help you to unlock the potential of your connectable devices to create a home that adapts and evolves with you.

Our options range from simple wireless connectivity to fully hard-wired systems.

Wiser Smart Home

Clipsal Wiser is a highly scalable smart home solution, making it easy for anyone to get started without a significant upfront investment. You can begin your smart home journey with just a Hub and a single device, allowing you to explore the benefits of home automation without breaking the bank. As your needs grow, Wiser seamlessly expands, enabling you to integrate more devices and features over time. This flexibility means you can tailor your smart home experience to your lifestyle and budget.

With Clipsal Wiser, you can control almost everything in your home from anywhere in the world via the Wiser Home app.

Wiser offers a comprehensive range of products for smart home automation and energy management. It is also compatible with Iconic indoor and outdoor switches and power points too.

It's perfect for renovation and new build alike as it doesn't require any special wiring and you can add as many or as few smart elements to your home as you'd like, with the option of expanding it over time.

Wiser products include energy monitoring, load control devices, light dimmers, smart switches and power points, blind controllers, and smart smoke alarms, as well as sensors for doors and windows, temperature and humidity, and even water leakage.

You can also create customised 'Moments', a collection of actions in one tap, like a 'Movie Moment' that dims the living room lights, and closes the blinds ready to snug up on the couch.

Plus, if you use a smart voice assistant such as Google Home, or Amazon Echo, you can control your Wiser smart home with voice commands too.

Wiser also allows you to set automations, which control your devices depending on certain conditions. For instance, you

could program your hallway lights to only turn on at 20% brightness if movement is detected late at night.

Throughout this magazine, we'll recommend products that can help you use Wiser to create an intuitive home customised to your lifestyle.

SpaceLogic C-Bus

C-Bus offers the ultimate in bespoke smart home automation. This specialist wiring system is best suited to large new builds or major renovations and links stand-alone elements in your house to a single point of control.

A C-Bus smart home can integrate with virtually any third party device, letting you control everything from lights, to underfloor heating and locks, and even the garden sprinklers.

Designed to work with fast-changing technology, C-Bus creates a home that can adapt to the future.

What next? Ask yourself: How would your ideal home work for you? What would make life in your home easier, or more enjoyable? Talk to your electrician or design consultant for advice on how to create the smart home of your dreams and visit clipsal.com/smarthome to discover more.

Beautiful spaces that inspire

Creating your perfect home means choosing switches and power points that enhance both the space and the way you live in it.

Iconic Collection

A range of stylish switches and power points with the option of simple smart home functionality, the award-winning Iconic Collection is the new standard in modern living for every home. Once the Iconic grid plates are safely installed by a qualified electrician, you can change your light switch and power point covers at any time. Simply clip off the existing cover and clip on a fresh new look.

Iconic

With smooth, curved edges and a matte finish, the base range is available in *Vivid White*, a brilliant white, perfect for lighter interiors and with a translucent or solid white edge. *Cool Grey* is a wonderfully versatile neutral that's ideal for interiors with subtle grey accents. *Anthracite* is a charcoal-like grey that complements dark and moody interiors, but also looks superb when paired with creamy whites and shots of bold colour. The ever-popular *Black* features a solid edge and works perfectly in monochrome interiors and homes with natural textures and finishes.

\$

Iconic Styl

Cool to the touch, Iconic Styl features an extruded aluminium finish designed to catch the light. It looks particularly stylish in kitchens and bathrooms against modern splashbacks or gloss tiles. *Silver* superbly complements interiors with contemporary appliances and tapware, while the *Crowne* finish is a glistening champagne tone that adds warmth to any space. *Silver Shadow* is the perfect finish for a cool, crisp décor and blends well with darker wall colours too.

\$\$

Iconic Essence

Iconic Essence features a sustainably sourced timber surround that is manufactured using a combination of traditional and high-tech techniques. The *Arctic White* finish brings together birch timber and matte white to blend perfectly into the surrounding wall colour – no matter which room you put it in. The *Ash Grey* finish looks stunning against the natural beauty of other raw building materials – perfect alongside slate or stone.

\$\$

Iconic Outdoor

Bring your unique indoor style outdoors with Iconic Outdoor. This award-winning range is robust, water-resistant, dustproof, and was built to withstand Aussie weather conditions. With smart connectivity and a modern design, it will add peace of mind and enhance the overall look and feel of your outdoor space. The matte *White* finish blends seamlessly into white walls and looks stunning against brick, render or stone, while the *Black* option complements raw surfaces and is striking with timber, concrete or metal.

\$\$

One of the things that makes the Iconic range unique is the variety of clever accessories available – from pictogram icons and USB chargers, to Night Walk sensor lights and energy-saving sensors. Iconic also integrates seamlessly with Wiser Smart Home to allow you to control lights and other home electrical devices via the Wiser by SE app or voice control.

Saturn Zen

The Saturn Zen range of switches and power points complement any modern architectural interior style. This contemporary range is like no other with its minimalistic look that is a favorite amongst design aesthetes.

Saturn Zen

With a minimalistic design and matte fingerprint-resistant finish, Saturn Zen adds sophistication to any space. Use *Zen White* to complement crisp white paint. *Zen Black* provides a strong, elegant finishing touch, especially when paired with natural finishes.

\$\$\$

Choosing premium switches and power points can make a huge difference to the overall look of your home and its electric home design. Whether your space is beautifully classic, sleek and modern, or more industrial cool, there is something for every style.

Metal Plate Series

Simple lines and a stylish finish in *Stainless Steel* or *Polished Brass* make the Metal Plate range a versatile choice.

The ultra-slim, minimal metal design makes this range perfect for high-end modern spaces with an industrial feel and is also the ideal finishing touch for renovated heritage villas. Choose between white or black base modules (buttons).

\$\$\$\$\$

Beautiful spaces that inspire

Creating your perfect home means choosing switches and power points that enhance both the space and the way you live in it.

The Clipsal Solis™ Collection

Discover the refined elegance of Clipsal Solis™ Collection. A contemporary take on a timeless style, Solis blends beautiful minimalism, premium materials and precision engineering, to become the new benchmark in electrical design. This luxurious range of electrical switches and power points are the ultimate finishing touch that will enhance your home and elevate your lifestyle. Solis is available in two series.

Solis™

The refined design of Solis is brought to life in a simpler form with two smooth matte finishes – *Matte black* and *Matte white*. Monochromatic simplicity at its finest, the push-button and switch design sits flush in an ultra-slim cover for an elegant addition to your home. Features include: discreet LED indicators, connected dimmer available with rotary or push-button control, USB Type-C fast charger, smart power point, full compatibility with Wiser Smart Home, sustainable product that complies with environmental regulations.

\$\$

Solis™ T Series

The pinnacle of the Solis Collection, Solis T Series is where classic design meets modern functionality. Solis T Series blends the old-school feel of robust toggles and brushed metal with modernist, perfect square edges and the thinnest of back plates. It evokes a time of craftsmanship, precision and tastefully understated design. Solis T Series is available in brushed metal finishes of *Platinum Aluminium* and *Ebony Aluminium*, a natural choice as it machines beautifully and takes a fine finish allowing clean edges and minute detailing. *White Ceramic* has an incredible level of durability and the finest of satin textures, giving a luxurious feeling and ensuring it will help resist dust and fingerprints.

\$\$\$

The elegant design of Solis integrates effortlessly with Clipsal smart home automation. Switches and power points in the Solis Collection are fully compatible with Clipsal's scalable Wiser smart home system. To create your bespoke smart home solution with Solis, speak to your electrician or Wiser Approved Installer.

Be inspired room by room

Your home's architecture and interior styling are key to creating a beautiful environment, but Electric Home Design can really bring each room to life. By planning how you want to live in your home, room by room, you can tailor electrical features and smart home connectivity to your lifestyle and make daily life at your place a pleasure. Read on for a guide on how you can be inspired.

Home, sweet home

Home is where our story begins. A place where we come and go, and where our children grow. It's a place to gather, where friends become family, and we can truly be ourselves. No matter what home means to you, Clipsal will always be there too.

AN INTUITIVE HOME. Imagine coming home after a long day and the outdoor and entrance lights automatically turn on, giving you safe passage and saving you from having to find the light switch when your hands are full.

SAFE AND SOUND.

Help keep your family, home and possessions as safe as possible by installing long-life, interconnected, photoelectric Wiser Smoke Alarms throughout your home. These smart alarms work like traditional alarms, but will also send you notifications via the Wiser Hub when smoke is detected. Integrated with the Wiser system, they can turn lights on in case of an emergency.

DESIGN TIP. Ever arrived home and struggled to find the light switch?

Consider adding subtle LEDs to your light switches. Set them as indicators to show which are in use; or as locators, so it's always easy to find the right switch in the dark.

FEATURED PRODUCT: ICONIC ESSENCE
SEE PG 38 FOR FULL PRODUCT SUITE

LIGHT THE WAY. There are several essential considerations when it comes to creating good electric home design in large spaces. Here are some pointers for your planning:

- Create a warm and welcoming atmosphere by choosing LED lighting throughout your home.
- Place light switches in convenient locations so you can turn the lights on and off easily.
- Use multi-way switching so lights can be controlled at either end of a hallway or staircase.
- Add motion sensors around your home, so you and your guests can easily find your way around, with lights that come on as needed.

HOT TIP. The hustle and bustle of family life means that mornings can get busy with getting ready for work and school, serving breakfast and packing lunches. Let your home work around you and your family by adding convenience and control with a few smart touches – like walking out the front door and turning off all lights and unnecessary appliances with a simple voice command.

ESSENTIAL PRODUCTS FOR THIS ROOM:

- Backlit LED Switches
- Iconic Night Walk Sensor Light
- LED Downlights
- Motion Sensor
- Switches and Power Points
- Wiser Connected Power Point
- Wiser Lighting Control
- Wiser Smoke Alarm
- Wiser Window / Door Sensor

To explore more solutions for your entrance, hallway and stairs, visit clipsal.com/entrance or scan the QR code.

For the homebodies

Our living room has a special place in our homes. It's our relax-and-unwind space, a place where we lose ourselves in stories, go on epic adventures, learn, laugh and spend precious moments together.

MOVIE MOMENT. Imagine walking into your living room, saying "movie time" and having your home create the perfect movie set-up for you: the blinds close automatically, the overhead lights dim to 20%, and the kitchen lights turn off. The only thing you have to worry about is remembering to bring the popcorn with you.

KEY SMART HOME PRODUCTS FOR THE ULTIMATE HOME CINEMA EXPERIENCE:

Create a "Movie Night Moment" with a simple voice command or tap on the app. You can close the blinds and turn off the lights to create the perfect movie time ambience.

Control your home on the Wiser home app from the comfort of your couch without missing a single moment from your favourite movie.

No matter how you want to control your home, Wiser helps make this seamless for your comfort and enjoyment, leaving you to enjoy life's simple moments.

SAFETY FIRST. If you have expensive electronic equipment such as a TV, gaming console or sound system, help protect them against lightning damage, power surges and voltage strikes with a Surge Protection Device, which an electrician can install into your electrical switchboard.

HOT TIP. TVs and audio equipment are a big investment to make, so don't be let down by bad connectivity. Boost your TV signal, streaming and audio quality with dedicated network and data cabling / outlets.

DESIGN TIP. For the perfect finishing detail, match your light switches to your décor.

The heart and hub of the home

Your kitchen can also be your home office, entertaining space, and memory-making place where master chefs and little cooks can learn and play. A place that connects the people in it today and grows with you well into tomorrow.

KITCHEN — P 16

Accentuate your kitchen's design with the Solis™ Collection range. With a variety of colours and finishes, it is the ultimate touch for those who demand luxury in every detail.

Gone are the days of fumbling for the light switch in the dark pantry when your hands are full. Install a motion sensor to provide light when the pantry door opens and turn off when it closes.

FEATURED PRODUCT: 360° INDOOR SENSOR
SEE PG 34 FOR FULL PRODUCT SUITE

HOT TIP. Ensure everyone is charged up and ready to start their day by adding a USB Type C fast charger, or USB Type A+C charging port to the power points around your benchtop and in cupboards to create the ultimate charging station.

Avoid clutter on your bench with an Iconic USB Smart Shelf. Designed to hold two smartphones or one tablet, the shelf keeps devices out of the way when charging – ideal for viewing recipes on your smart devices.

FEATURED PRODUCT: ICONIC ESSENCE
SEE PG 38 FOR FULL PRODUCT SUITE

DESIGN TIP. Lighting should be considered well in advance as good lighting adds to the overall design of the kitchen and can enhance the overall look and feel of the space.

Zero in on each zone and think about what exactly it needs. Install energy efficient lights overhead for areas such as benchtops where you need task lighting, and then complement with LED light strips and feature lights.

FEATURED PRODUCT: LED DOWNLIGHTS

Make your dining space your favourite place

The dining room is a place for celebration, sharing memories and catching up with loved ones. It's a space for impressive entertaining, where you and your guests can relax, unwind and share in some of life's most precious moments.

DINING ROOM — P 18

SET THE MOOD. Love entertaining friends and family? Imagine setting the perfect mood with the tap of a screen or a voice command. The overhead and pendant lights turn on and dim to just the right level, while all unused lights around the house automatically turn off.

To ensure you dine in comfort, the blinds close and your favourite playlist will start playing through your smart speaker.

LIGHTING DESIGN. Impress your guests with ambient, decorative and energy efficient LED lighting paired with a dimmer so you can effortlessly create a relaxing atmosphere. Match your downlights to the style of the room, available with a White, Brushed Chrome, or Black surround.

DESIGN TIP. Dine in style! Solis™ T Series blends the old-school feel of robust toggles and brushed metal with modernist, perfect square edges and thin, flush covers. It is available in three premium finishes.

ESSENTIAL PRODUCTS FOR THIS ROOM:

- Dimmer
- LED Downlights
- Switches and Power Points
- Wiser Blind Controller
- Wiser Connected Power Point
- Wiser Lighting Control
- Wiser Temperature / Humidity Sensor

To explore more solutions for your dining room, visit clipsal.com/dining-room or scan the QR code.

For the soakers

Being one of the busiest rooms in the home, the bathroom needs to be a chameleon, transitioning through the demands and daily routines of your family life, while also being a space where you can relax and unwind.

COMFORT ON DEMAND. Imagine preparing a relaxing bubble bath at the end of a long day. The Wiser Temperature / Humidity Sensor automatically triggers the exhaust fan when an increase in humidity is detected. The lights dim and soft music starts playing to set the mood. And when you're done, everything turns off automatically, so the only thing you have to do is enjoy a good night's sleep.

DESIGN TIP. Elevate your bathroom design with the Iconic Essence and Iconic Styl ranges and enhance the attention to detail by adding Pictogram Icons to individual switches.

LIGHT THE WAY. Ensure that kids and guests can find their way around safely at night by integrating a Wiser Motion Sensor with your bathroom and hallway lighting. Schedule lights to turn on at a dimmed brightness between set hours, allowing just enough light for safe passage.

HOT TIP. Add cool white LED lighting to your bathroom; it mimics natural light, which will help you wake up while you're getting ready in the morning. Add a dimmer too, for when you need softer, more soothing light.

PEACE OF MIND. Add comfort and convenience to your bathroom with a Wiser Connected Power Point. Set it to turn on and off at select times or use the timer function, or control it via your smart device. You'll never have to wonder if you've left the hair straightener on again. Also ideal for electric toothbrushes and shavers.

For the inspired minds

Whether you work from home, need a place to get life admin done, or have carved out a space for the kids to do their homework, make your home office a place that inspires the flow of creativity, productivity and focus.

DESIGN TIP. Add USB charging ports to your power points and say goodbye to bulky chargers. The Iconic USB Type C fast charger will always have your devices ready. Add USB charging ports to your power points and say goodbye to bulky chargers. The Iconic USB Type C fast charger will always have your devices ready for use.

Imagine a work-from-home space with lighting, blind and temperature control at your fingertips. A space that helps you achieve flow, boosts efficiency and promotes productivity so you can get through your to-do list effortlessly.

HOT TIP. Unnecessary lead and extension cables make the tidiest of spaces feel messy and disorganised and can be a fire hazard. Declutter your space and keep your equipment safe by installing a quad power point.

STAY CONNECTED. Adding data and network cabling / outlets to your home office can significantly increase internet speed, connection, reliability, and overall security. It's perfect for gamers, streamers and work-from-homers. You'll no longer have to play 'conference call bingo' or risk losing that game because of an unstable connection.

Your hideaway haven

Whether you're a jump-out-of-bedder or sleepy-header, your bedroom is your sanctuary; a place to rest, relax and recharge at the end of each day. It's where you get ready each morning for all of life's moments, big and small.

SLEEP SOUNDLY.

From blinds that close to keep the warmth in, USB charging ports at the ready and lights that dim as you prepare for bed, your bedroom can be tailored to your every need.

COMFORT AND CONTROL.

Make sure to get a good night's sleep by keeping your oasis at just the right level of comfort with a Wiser Temperature / Humidity sensor and a Wiser ceiling fan controller.

DESIGN TIP. Complete your décor and add a point of difference to your bedroom with the Iconic Styl range.

The range features an extruded aluminium finish and is available in three colour options, so there's something to suit your unique style.

HOT TIP. Layer overhead LED downlights with LED strips under cupboards and add a full-length mirror to create a luxe in-store feel to your walk-in-robe. Add a motion sensor for energy efficient and convenient lighting when your hands are full.

FEATURED PRODUCT: ICONIC PIR MOTION SENSOR

Rise and shine

From those exciting early days preparing a nursery, to tea parties and all sorts of adventures, big and small, your child's bedroom is where they can recharge, discover the world, play and learn.

KID'S BEDROOM — P 26

SMOKE ALARMS YOU CAN DEPEND ON.
Clipsal smoke alarms are a small investment as they help protect what matters most to you; your family, home and possessions, both valuable and irreplaceable.

A BEAUTIFUL MESS. As your little adventurer grows, it's likely that their bedroom floor will be full of toys, books and other things from time to time. Keep little feet safe during late night trips to the bathroom with the Iconic Night Walk Sensor Light, or use it as an all-night light to help keep the night monsters away. Once they have grown out of it, simply change the cover to convert it to a handy double power point – ready for those teenage years.

TIPS TO SET THEM UP FOR THE FUTURE.

- For both little ones and adults alike, install light switches in areas that are easy to reach for. Think about how they'll use the space as they grow.
- As your children grow, they will likely need more power points in their rooms. To prevent safety hazards from power boards and extension cords, consider installing extra power points in advance.
- Install dimmers to get the right lighting for every task, from bright and vibrant for play and homework, to dim and low for snuggling in for bedtime stories.
- Kids have many devices they use for learning and playing, so why not add convenience to their lives with a USB charger or USB Smart Shelf.

ESSENTIAL PRODUCTS FOR THIS ROOM:

- Ceiling Fan
- Dimmer
- Iconic Night Walk Sensor Light
- LED Downlights
- Smoke Alarms
- Switches and Power Points
- USB Charger
- Wiser Connected Power Point
- Wiser Fan Controller
- Wiser Lighting Control

To explore more solutions for your kid's bedroom, visit clipsal.com/kids-bedroom or scan the QR code.

Lighten the load

Some of the best and most memorable days end with dirty clothes. Whether you're preparing for a special occasion, getting ready for the week ahead, or packing for a holiday, it all starts with a laundry day.

HOT TIP. Forget fumbling in the dark for a light switch while your hands are full.

Get convenience and energy efficiency in your laundry with a motion sensor. It will automatically turn the lights on when you enter, and off after you've left.

FEATURED PRODUCT: ICONIC
SEE PG 37 FOR FULL PRODUCT SUITE

KEEP DRY. Ever had a water leak and discovered it too late? The Wiser Water Leakage sensor sounds an alarm and sends a notification to your phone so you can avoid nasty surprises.

DESIGN TIP. Do you prefer your laundry to have a crisp, clean, all-white look, or does it feature a pop of colour with bold wallpaper, or maybe you prefer a dark and moody design? The Iconic range has a variety of finishes and colours to complement whatever style you choose.

CLEAN AND COMFORTABLE. Laundries can quickly become warm, humid spaces that are uncomfortable to be in. Install an Airflow Exhaust Fan and combine it with the Wiser Temperature / Humidity sensor to automatically clear the air and keep the space comfortable.

NO WORRIES. Set your Wiser Connected Power Point to only stay on for a set period of time, so you never have to worry about leaving the iron on.

ESSENTIAL PRODUCTS FOR THIS ROOM:

- | | | |
|--------------------|-------------------------------|---------------------------------------|
| • Exhaust Fan | • Surge Protection | • Wiser Temperature / Humidity Sensor |
| • LED Downlights | • Switches and Power Points | • Wiser Water Leakage Sensor |
| • Motion Sensor | • Wiser Connected Power Point | |
| • Quad Power Point | • Wiser Lighting Control | |

To explore more solutions for your laundry, visit clipsal.com/laundry or scan the QR code.

More than just a parking space

Arriving home to your loved ones and your own private sanctuary is a moment to look forward to each day. Whether you're returning from work or from running errands, or coming home from holiday, there's nothing quite like coming back to the place where you belong.

CHARGE UP AND GO. Charge your electric vehicle quickly, safely and cost-effectively with a Schneider Charge EV Charger.

Don't have an EV yet? Why not pre-wire your home so it's ready when you are? It'll also be a great selling point when you're ready to move on.

SWITCHBOARD SAFETY. Your electrician is your partner for all your electric home design needs. Ask them about switchboard safety to ensure your home's electrical is up to date and optimised to help offer the ultimate in protection. This is especially important if your home was built before 1980.

Your electrician will make sure you have the right electrical protection to help keep your family safe against shocks and arc faults that cause electrical fires. They can also add protection against power surges that could damage your appliances and electronic devices.

FEATURED PRODUCT: MAX9 CIRCUIT PROTECTION.
SEE PG 38 FOR MORE INFO

LIGHTS ON. Set your lights to turn on automatically as you enter the garage and off when you exit, with a Wiset Motion Sensor. It can also send an alert to your phone if motion is detected unexpectedly.

DESIGN TIP. The Iconic Outdoor range can withstand dirt, moisture and bumps. With its clean, sleek design and smart connectivity, it's a must-have for any garage.

ESSENTIAL PRODUCTS FOR THIS ROOM:

- EV Charger or Wiring Provision
- LED Downlights
- Wiset Garage Door Control
- Iconic Outdoor Switches and Power Points
- Motion Sensor
- Wiset Lighting Control
- LED Batten Lights

To explore more solutions for your garage, visit clipsal.com/garage or scan the QR code.

Outdoor like never before

Hot summer days are for spending time outdoors, relaxing or entertaining on the deck, playing games in the pool, or pottering in the garden. But as day turns to dusk, outdoor fans create a soft breeze by the barbie, heaters keep the party going in cooler months, and atmospheric garden lighting adds to the mood.

OUTDOOR — P 32

DESIGN TIP. When carefully considered, exterior lighting can help you navigate safely when it's dark. It can also create ambience and add an overall sense of elegance to your home.

Place lights in front of plants and key garden features to create a warm and inviting look.

FEATURED PRODUCT: FLOODLIGHT WITH SENSOR
SEE PG 34 FOR FULL PRODUCT SUITE

LIGHT THE WAY. The Infrascan® Motion Sensor detects your moves and triggers outdoor lights when you need to find your way in the dark, and saves power when the light is not needed. It's weatherproof and detects movement up to 18m away at a 110-degree angle, has adjustable sensitivity, light level and time delay for ultimate control.

STYLISH AND COOL.

Keep everyone comfortable with a Classic Sweep fan. With its soft round edges, in both a black and white finish, this contemporary fan is ultra-quiet and maximises airflow. Perfect for cooling down and keeping those warm summer days under control.

OUTDOOR — P 33

RELIABLE AND ROBUST.

Create a seamless experience by having your indoor style flow through to the outdoors, and still enjoy the indoor comforts: fans, fridges, heating, lighting, music and more.

Iconic Outdoor switches and power points were built to withstand the Australian outdoors and integrates with the Wiser Smart Home system, giving you more control and connecting your home from the inside out.

ESSENTIAL PRODUCTS FOR THIS ROOM:

- Ceiling Fan
- Exterior Lights
- Iconic Outdoor Switches and Power Points
- LED Downlights
- Motion Sensor
- Switchboard and Circuit Protection
- Wiser Fan Control
- Wiser Lighting Control

Your safety, our priority

The new rules for smoke alarms

Ensuring your home is protected

WHY REPLACE SMOKE ALARMS EVERY 10 YEARS?

Did you know that smoke alarms have a limited lifespan? After 10 years, it's crucial to replace your smoke alarm to ensure it continues to protect your family effectively.

STAY COMPLIANT, STAY SAFE

In Australia, smoke alarms must comply with Australian Standard AS 3786, meaning they should be photoelectric, interconnected, installed on every level of a dwelling, including inside each bedroom and hallways connecting bedrooms, and be either hardwired or powered by a non-removable 10-year battery; essentially requiring all smoke alarms in a home to activate simultaneously when one is triggered.

MAXIMISE YOUR PROTECTION

To ensure the highest level of safety, it's recommended to install smoke alarms in every room (excluding kitchens, laundries, and bathrooms) and interconnect them. This way, if one alarm detects smoke, all alarms will sound, giving you and your family the best chance to escape safely.

WHERE TO INSTALL YOUR SMOKE ALARMS

Proper placement is key. Avoid areas that might cause false alarms, such as near windows or air vents. For optimal protection, install alarms outside sleeping areas and on every level of your home.

Talk to your electrician about installation to keep your family safe and your home compliant with the latest standards.

Learn more at: clipsal.com/smoke-alarms

FOR THE
design devotee-ers

Imagine living in a home that truly reflects you. Your style, your personality, your finishing touches. Where every detail has been considered, with colours, textures and designs working together to create your unique space.

A space for impressive entertaining, that moves through the evening as you do, with subtle lighting and temperature control to set the mood. A space that looks as good as it feels and has the flexibility to evolve for whatever tomorrow brings.

This is electric home design from Clipsal.

Learn more at: clipsal.com/homebodies

Let us help you plan with professional design advice

Our professional electrical design consultants can provide advice or deliver a tailored home electrical and lighting plan that's right for you via an in person or virtual consultation.

This service is by appointment only. To view locations, make a booking or discover more please visit: clipsal.com/design or call **1300 669 925**

Or continue your journey online

MY HOME ENHANCER

Answer a few questions about your project and the My Home Enhancer will provide you with budgeting advice and personalised recommendations to help optimise your electrical plan.
